

CAMBO HD SLR CS CAMERA SUPPORT SYSTEM

The Cambo HD SLR CS Camera Support System is a modular 'Rig' designed to support Digital SLR and DV camera systems when shooting High Definition video. All CS systems offer the photographer or video-grapher support to achieve stable images and precision control.

Choosing a Camera Support

The key component in Cambo's CS System is the CS-M1 Camera mount. This component is height adjustable making the system compatible with a wide range of HD SLR and DV cameras. As the CS system is modular you can start by using the CS-CILIX and add components as and when you want, enabling you to custom build the system suitable for you. Or you can select a pre-designed solution from the CS System range. All components are manufactured in Cambo's factory in The Netherlands from high-grade aluminium, which is anodised ensuring a long lasting finish and high durability.

CS-CIRUS

CS-STYX

CS-ERIS KIT

Portable, Adjustable and Stable

There is a choice of "off the shelf" portable solutions available with a greater control of camera positioning with x, y and z axis movements. The CS-STYX, CIRUS, ZODIAC and ERIS give greater stability with the Ergonomic Shoulder Pad and optional balanced counter weights for ultimate comfort and control. All models have flexible upgrades offering limitless opportunity, the best in design, stability and comfort.

Modular and Functional

The CS System consists of modular and multifunctional parts and accessories. This enables you to pick and choose what you need and then later add other accessories to the system. Attaching additional components to your CS system such as lighting units, microphones and monitors is quick and easy. The bracket system CS-154 has bottom, side and top accessory mountings for use with the CS-CHRONOS professional Cinema Rig, CS-ERIS, ZODIAC and STYX.

CS-CILIX
with CS-M210

In the Studio

The CS-CILIX has dual grips for added stability, it has the smallest footprint making it ideal for handheld capture. When combined with a fluid head tripod, Follow Focus Control, CS-30 Loupe system and Matte Box kit you have a complete professional studio solution with precision control.

On-location

Of course you don't have to be restricted to using a rig in the studio. By adding the CS-P1 Ergonomic Shoulder Pad and rods to the CS-CILIX you can comfortably shoot on-location. A Loupe is recommended not only to ensure image sharpness and composition but also to prevent glare on the DSLR screen. With Cambo's removable Loupe build with Schneider optics and 3x diopter you will be certain to capture ultra sharp images.

Focus Control

The CS-MFC-2 is a compact Follow Focus control unit enabling ultra precise focussing. Its unique design with two pivoting points allows for quick, easy and secure repositioning when changing lenses, just with the twist of one simple knob. Thanks to this construction the Cambo Follow Focus can be adapted to any lens diameter, it can be placed angled down or upwards and gears can be placed on the front or rear side by choice based on the lens design. The outer ring can be premarked to determine your focus points and is exchangeable. The CS-MFC-2 features two adjustable hard stops to limit the focus draw by choice.

Memory Function

A key feature on the CS-ERIS and CHRONOS Systems is the Memory Function. This simplifies the repeat setup process and optimises the position of the camera to the shoulder support. Your rig can easily be packed away and setup again within minutes.

Accessories

To complement the CS-System there is wide range of accessories such as Matte Boxes, Viewing Loupes, Counterweights, Battery mounts, Monitor/Mic supports and more.

Viewing Loupe System

Cambo's CS-30 Viewer system for HD/SLR cameras features a 3x magnification loupe, made with Schneider Kreuznach optics, offering adjustable dioptré setting for best viewing comfort. The set will have different mounting possibilities to adapt to the preferred working method of the videographer or photographer.

The CS-31/32/33 and 34 versions include an adjustable bracket for mounting the viewing hood to the tripod mount of the various SLR cameras, avoiding having to glue a frame to the back of the camera. The Viewer fits with various frames to 3" as well as the latest 3.2" screens.

The Viewer fits with various frames to 3" as well as the latest 3.2" screens.

Mattebox CS-M210

The CS-M210 kit comes with a 15mm bars adapter. This mattebox includes one rotatable 4"x4" filter tray and place for one fixed 4"x4" filter in the front end of the hood. This mattebox works with most wide angle lenses in both 4:3 and 16:9 aspect ratios, without vignetting. The mattebox includes a set of foam rings to seal around the lens.

An optional French Flag is available as CS-M21050.

Mattebox CS-M100

The CS-M100 Mattebox is featured with a self supporting flexible hood suitable for both 16:9 and 4:3 formats. It allows for adjustments for optimum shading with any focal length. The bars adapter is height adjustable and the kit includes a set of foam rings to seal around the lens. The flexible hood can be folded flat for transportation, taking up a minimum of space.

Handgrips CS-H1, H2, H9

Cambo offers a choice of handgrips which are all covered with ergonomic grip enhancing rubber.

While the CS-H1 is a compact direct handle, the CS-H2 handle features a telescopic mechanism, the length of the handle can be adjusted on the fly with a simple twist movement. The handle can rotate 360° and swivel 30°. This way the handle can be set to the most comfortable position for use. The CS-H9 is the Low Position Handle.

Monitor / Microphone Support CS-M8

The CS-M8 will mount to any 15mm rod of the system and features a 1/4" mount for an optional CS-396/397 Ball Socket Head for mounting your Monitor or Mic.

CS-1500 Rods

The 15mm Rods of Cambo's CS system are made of high grade black anodised aluminium made for years of performance. Each Rod features 3/8" threading on both ends for extensions and accessories. The surface has a special grooved pattern to assure positive locking at any time. Lengths are ranging from 12cm to 46 cm.

Camera - Tripod Mounts

Cambo offers a variety of mounting possibilities for your HD/SLR or DV camera. The CS-M0 fits to the 15mm rods for direct mounting the camera, the CS-M1, M2 and M3 include a 1/4" tripod mount, while the CS-M5 comes with a mounting fitting the Manfrotto® 357 quick release adapter. CS-M2 and CS-M3 have a camera mount dedicated to DV cameras.

Rod Connectors

A wide choice of connecting parts to customise your CS-Rig to your own wishes is available. Perpendicular, parallel, 2-way, 3-way or 4-way connectors, Offset brackets, In-line extension, 1/4" and 3/8" connectors and more. See www.cambo.com for a full overview.

Counterweights

A steady rig is required for shooting video. Cambo CS-Rigs can easily be balanced using counterweights. The CS-180 (0.8 kg) are mounted with a 3/8" thread to the P1 Shoulder part directly or to any CS-1500 Rod end. Weights are stackable on each other. CS-181 and 182 are designed to fit to two rods for a fine-tuned balance.

Battery Plate

The CS-189 Battery Plate can be used for mounting a battery holder such as the Cambo PT-960 V-mount adapter. CS-190 includes a mounting clamp, while the CS-191 and CS-192 combine this with counterweights.

Gear Accessories

To operate your Follow Focus unit with multiple lenses Cambo offers a set of 3 gearstrips m0.8 as CS-290. Optional are the rubber drive CS-280 and m0.5/0.6 gears. Also the Flex Cable/Focus Whip CS-FC500 and the Star Knob CS-FC505 will enhance your ease of use.

Visit www.cambo.com for a complete overview.

CS-CHRONOS Professional Cinema Rig

- DSLR Offset Rig fully adjustable in x, y and z axis
- Quick reassembly CS-151 memory clamps
- Telescopic CS-H2 handle grips
- Brackets CS-154 for bottom, side and top accessory mounting for monitor, mic, light

Optional accessories:

- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-CIRUS Offset Rig

- DSLR Offset Rig fully adjustable in x and y axis
- Adjustable optic centre of the lens and iris rods
- Lower Camera Mount clamp CS-153
- Adjustable shoulder pad
- Wide range of camera compatibility

Optional accessories:

- Brackets CS-154 for bottom, side and top accessory mounting
- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-ZODIAC Offset Rig

- DSLR Offset Rig adjustable in the x-axis
- Adjustable optic centre of the lens and iris rods
- Lower Camera Mount clamp CS-153
- Adjustable shoulder pad includes counterweight
- Wide range of camera compatibility

Optional accessories:

- Brackets CS-154 for bottom, side and top accessory mounting
- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-ABRIX Camera Grip

- Handheld Rig
- Adjustable optic centre of the lens and iris rods
- Wide range of camera compatibility
- Soft shoulder support

Optional accessories:

- Handgrips CS-H1 & H2
- Viewing Loupe CS-30 system

CS-DV Camera Grips

- Dedicated configuration available for many DV cameras including Blackmagic, Canon, Panasonic and Canon
- Adjustable optic centre of the lens and iris rods
- Wide range of camera compatibility
- Soft shoulder support, DV style camera mount

Optional accessories:

- Supports for mic & light
- Follow Focus Kit CS-MFC
- Matte Box Kit
- Battery plate -included in some versions

CS-ERIS Fully Adjustable Rig

- DSLR Offset Rig fully adjustable in x, y and z axis
- Quick reassembly CS-151 memory clamps
- Telescopic CS-H2 handle grips

Optional accessories:

- Brackets CS-154 for bottom, side and top accessory mounting for monitor, mic, light
- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-CILIX Dual Handheld Grip

- Handheld Rig
- Dual Grip handle CS-H1
- Adjustable optic centre of the lens and iris rods
- Wide range of camera compatibility

Optional accessories:

- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-STYX Shoulder Mount Rig

- Compact DSLR/DV Rig
- Handle CS-H1 offset and angle adjustable
- Adjustable optic centre of the lens and iris rods
- Adjustable shoulder pad
- Wide range of camera compatibility

Optional accessories:

- Brackets CS-154 for bottom, side and top accessory mounting
- Follow Focus Kit CS-MFC
- Matte Box Kit
- Viewing Loupe CS-30 system

CS-BRONTO Camera Grip

- Handheld Rig
- Adjustable optic centre of the lens and iris rods
- Wide range of camera compatibility
- Low Position handle CS-H9

Optional accessories:

- Handgrips CS-H1 & H2
- Viewing Loupe CS-30 system
- Follow Focus Kit CS-MFC
- Matte Box Kit
